

KIPP INC.

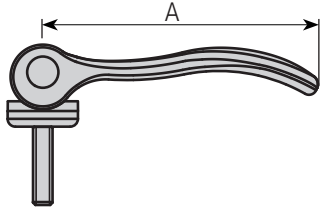

From the **smallest cam lever on the market**, to one of the largest...

MANY OPTIONS. SINGULAR QUALITY.

# CAM LEVERS

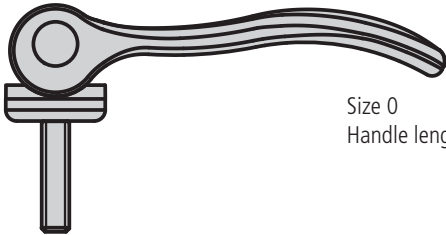

KIPP cam levers come in a wide variety of sizes, materials, and design options, including one of the smallest cam levers on the market (our size 9 at just 36.2 mm). Popular materials include stainless steel, plastic, and cast aluminum. Our new all-stainless model features an entirely metal washer for added durability.

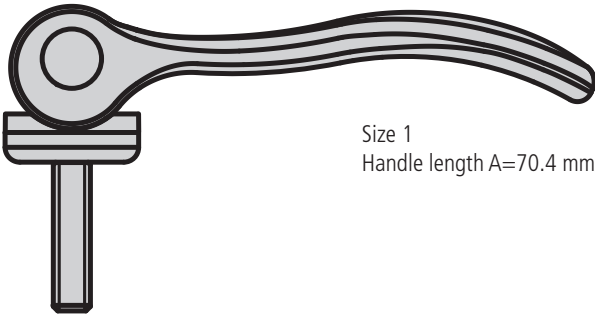

**The smallest cam lever on the market!**

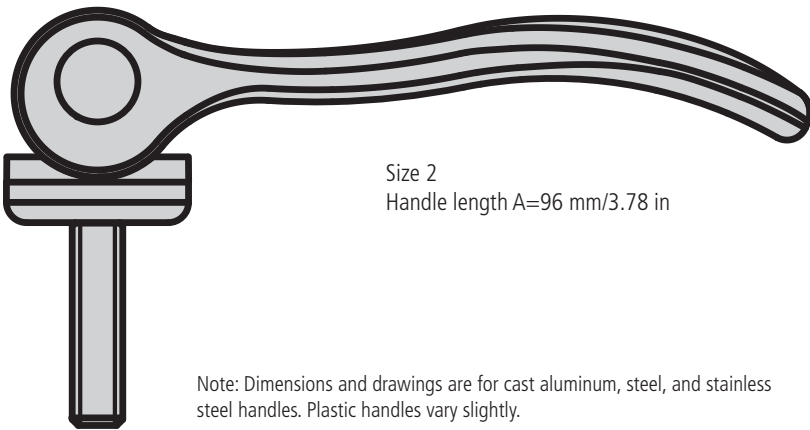

Size 9  
Handle length A=36.2 mm/1.43 in

Size 0  
Handle length A=52.3 mm/2.06 in

Size 1  
Handle length A=70.4 mm/2.77 in

Size 2  
Handle length A=96 mm/3.78 in

Note: Dimensions and drawings are for cast aluminum, steel, and stainless steel handles. Plastic handles vary slightly.

**New Item**

### Entirely Stainless

Features an entirely stainless steel washer lubricated with food grade grease. Ideal for high temperature applications. Polished or blasted finish available.

**Expanded Line**

### Stainless Steel

Perfect for challenging applications; includes stainless steel-plastic hybrid thrust washer. Size 9 available. Economical blasted finish now available!

### Cast Aluminum

Available in red or black, these cast aluminum cam levers are powder coated for durability and good looks; with stainless steel or steel hardware. Size 9 available.

### Steel

Steel handles with a blue chromate finish make these handles tougher than aluminum and more economical than stainless steel. Available in size 1 and 2.

### Plastic

Fiberglass reinforced plastic makes these handles light and durable. Available with stainless steel or steel hardware.

### Adjustable

For use in tight spaces where handle rotation is restricted. Available with stainless steel, aluminum, or plastic handles.
