

Wedge clamps double wedge, jaw faces serrated

Item description/product images

Description

Material:

Body and jaw segments tool steel.

Version:

Body hardened.

Jaw segments hardened (49-51 HRC) and black oxidized.

Wedge faces ground.

Note:

The compact design makes these double wedge clamps ideal for horizontal and vertical series clamping. The hardened and ground wedge faces can exert high clamping forces.

These wedge clamps can be mounted in grid holes or T-slots. Tightening the DIN 912 socket screw pulls the wedges together and the jaws out pressing the workpieces against the fixtures fixed stops.

The double wedges create a positive down force.

Spread width:

K0042.12 = ± 1.0 mm

K0042.16 = ± 1.5 mm

Drawing reference:

D) DIN 912 cap screw

- 1) Wedge clamps
- 2) Workpiece
- 3) Fixed stop
