

Captive washers, plastic

Item description/product images

Description

Material:
Polyamide.

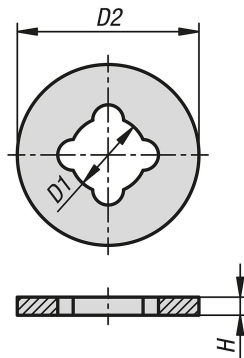

Version:
white.

Note:
The washers are vibration dampers and protect the screw connection during e.g. pre-assembly.
The washers also protect the surface from damage.
Only suitable for threads with undercut i.e. ring bolts

Application:
Press or twist the washers over the thread.

Attention:
When shim washers with rings bolts are used, the forces specified for the ring bolts cannot be guaranteed.
