Exclusive offer - call or email for pricing and availability!

NEW STAINLESS STEEL RULES

Kipp stainless steel rules are corrosion resistant with deep laser etchings for better wear resistance. A permanent adhesive back allows for mounting on machines, workbenches, walls, and tanks to measure distances, heights, and depths. Strong and durable, yet slightly flexible, the rules can be mounted on gently curved surfaces. Graduations on both edges allow for mounting top or bottom, left or right, or in places where measurements are made on both edges.

Exclusive Offer!

This product is so new, you won't find it on our website—contact us today for pricing & availability!
